

## **Meritech, Inc. Announces Buttercup Dental uses its CleanTech® System**

*Fully-Automated Handwashing System kills germs for up to six hours  
for the improved protection of patients and healthcare workers.*

GOLDEN, Colo., January 8, 2007 — Meritech, a division of Resurgent Health and Medical and the leader in automated handwashing and sanitizing technology, announced today that Buttercup Dental is now using the CleanTech® 500EZ Automated Handwashing System. The dentists and staff are using the system to make handwashing quick and easy. The CleanTech system increases staff compliance for an effective and sanitary hand hygiene program.

“The safety, cleanliness, and sanitation of our office is a top priority and by using the CleanTech system, we are assured we are practicing proper hand hygiene at all times,” said Dr. Darrell Park of Buttercup Dental. “We have embraced a modern approach to dental care and utilize the latest technologies available - the CleanTech system is another step towards providing the best practices for our patients. The machine is automated and easy to use.”

The touchless system performs a fully-automated fifteen-second wash, sanitize and rinse cycle. Using Meritech's proprietary Chlorhexidine Gluconate (CHG) sanitizing solution, the single cycle removes over 99.9% of pathogens and continues to kill germs for up to six hours. The FDA certified CHG-based sanitizer contains mild skin conditioners to improve skin health while removing dangerous pathogens.

The system further boosts compliance by ensuring a pleasant, uniform handwash using high-pressure water jets that perform a consistent wash-and-sanitize cycle every time the machines are used.

### **About Meritech**

Meritech, Inc., a division of Resurgent Health and Medical of Golden, Colo., is the leader in automated handwashing and sanitizing technology. For almost 20 years, its Cleantech® brand systems have been used worldwide in agriculture, food processing, food service, cleanroom manufacturing and healthcare. CleanTech uses up to 75% less water than manual handwashing, discharges 75% less wastewater, and reduces waste in soap utilization.
