

Resurgent Health and Medical Partners with Attainia

GOLDEN, Colo., February 23, 2009--Resurgent Health and Medical, a leader in automated hand hygiene technology and Attainia, Inc., the largest healthcare capital equipment management systems company, have recently entered into a multi-year agreement.

Under the agreement, Attainia will support the full line of Resurgent's fully-automated handwashing equipment for project consideration. The relationship with Attainia enhances Resurgent's medical placements and allows hospital architects and equipment planners to easily specify CleanTech® handwashing systems into future projects.

"Attainia is enthusiastic to support Resurgent's cutting edge technologies in our capital planning system," said Anil Singhal, MD, VP of Supplier Programs. "Hospital acquired infections are a serious problem and having Resurgent's solutions readily available for healthcare projects will broaden access to simple preventative solutions."

The CleanTech touchless system performs a fully-automated twelve-second wash, sanitize and rinse cycle. Using Resurgent's proprietary Chlorhexidine Gluconate (CHG) hand soap, the single cycle removes over 99.9% of pathogens and continues to kill germs for up to six hours. The FDA certified CHG-based sanitizer contains mild skin conditioners to continuously improve skin health while removing dangerous germs.

The system further boosts compliance by ensuring a pleasant, uniform hand wash using high-pressure water jets that perform a consistent wash-and-sanitize cycle every time the machines are used.

The CleanTech IC system can also come equipped with CleanTracker™ RFID compliance monitoring software. CleanTracker is the only fully functional RFID technology available to track handwashing compliance.

About Resurgent Health & Medical

Resurgent Health and Medical delivers state of the art employee hygiene technologies to hospitals and healthcare facilities that are serious about infection prevention and the elimination of dangerous pathogens in the healthcare industry. Our patented CleanTech infection prevention technology brings science and precision to the process of removing dangerous microbes from hands. For almost 20 years, its CleanTech brand systems have been used worldwide in agriculture, food processing, food service, cleanroom manufacturing and healthcare. CleanTech uses up to 75% less water than manual handwashing, discharges 75% less wastewater, and reduces waste in soap utilization. For more information, visit
