

Meritech Launches the XBW 2.0 – a US manufactured high-throughput bootwashing system

System specifically designed to clean faster and more efficiently

GOLDEN, Colo. August 8, 2008 — Meritech, Inc., a division of Resurgent Health and Medical and a leader in automated handwashing and sanitizing technology, announced a new addition to its line of automated hand and boot washing equipment. Meritech now offers a walk-through, high volume throughput boot washing/scrubbing system called the XBW 2.0 - the only one of its kind manufactured in the United States and backed by a two year warranty.

This high throughput system improves plant productivity by enabling 15 people per minute to completely clean, scrub and sanitize boots. The new system washes the soles, sides, and tops of the boots. This system provides a faster, more complete, and more cost effective method for food plants to address the important issue of washing and scrubbing the boots of employees entering a work area many times per shift. The first production system was shipped in July to a deli commissary of a large retail chain.

“The first XBW 2.0 was shipped to a large retail chain commissary in July, and we are thrilled to have the only US manufactured product available. The system is geared to specifically move people in and out of processing plants quickly and efficiently,” said Jim Glenn, CEO of Meritech. “We are helping medium to large sized companies expedite their employees’ entry and exiting routine, which has proved in the past to be a time-consuming and costly process until this new product.”

The XBW 2.0 promises to be the most effective high volume boot scrubber available. Constructed of heavy duty stainless steel, this unit utilizes a series of horizontal brushes to effectively sanitize the soles and sides of most boot configurations. The XBW 2.0 is an industrialized walk-through system designed for high volume facilities with a large number of employees, providing the ideal solution and a quick return on your investment. To receive more information on these models and Meritech’s other automated hand and bootwashing equipment, please call (800) 932-7707 or go to www.meritech.com.

About Meritech

Meritech, Inc., a division of Resurgent Health and Medical of Golden, Colo., delivers state of the art employee hygiene technologies to companies that are serious about the elimination of dangerous pathogens in the workplace. For almost 20 years, its CleanTech® brand systems have been used worldwide in food processing, food service, healthcare, hospitality and clean room manufacturing. CleanTech uses up to 75% less water than manual handwashing, discharges 75% less wastewater, and reduces waste in soap utilization. For more information, visit www.meritech.com.
